

Exercise 04

Designing my First Java GUI Program

Objectives: At the end of this exercise, students are expected to design a form with different components.

Requirement:

1. Write a java program that will display a form similar to what is shown below. The form must contain the following components: **frame, label s, text field s, button s, dropdown list, checkboxes and radio buttons.**

2. Design the given GUI manually and **do not use any layout manager**, use only setBounds method.

3. This is an individual task; thus, you are required to create a java program with graphical user interface. Name your file with **[SURNAME][Name]_Exer4.java**.

Eg. RODRIGUEZVincent_Exer4.java

4. Also, kindly accomplish the other document which contains the proper documentation of this activity (**format below**). Save the document as **[SURNAME][Name]_Exer4Doc.pdf**. Do not forget to save your document in portable data format or pdf.

Eg. RODRIGUEZVincent_Exer4Doc.pdf
